

Disposal & Recycling Services

Transformers • Oil • Electrical Equipment • Oil Sales

DISPOSAL & RECYCLING

Highest-Capacity Furnaces

EPS' custom-built furnaces have the largest incineration capacity in the nation, disposing and recycling non-PCB and PCB-contaminated electrical equipment, including:

- Transformers
- Switches
- Regulators
- Capacitors
- PTs
- Circuit Breakers
- Bushings
- Reclosers
- Gas Pipe
- CTs

Transformer Buyback Program

We pay you to remove and recycle valuable retired substation transformers and scrap metal.

PCB REMOVAL

Minimize Risk & Liability. Maximize Safety & Environmental Responsibility.

EPS is the nation's leader in removal and recycling substation transformers and equipment, and is EPA approved for both disposal and storage.

OIL RECYCLING

We Pay More for Used Oil

EPS' unique system results in processing costs that are much lower than the competition, allowing our customers significantly higher value for their used oil.

OIL SALES

Millions of Gallons Refined

EPS chemically treats and refines millions of gallons of transformer oil every year using our proprietary PCBXSM system.

The Best Pricing

As a high-volume refiner and re-seller of recycled oil, our Quality Blend and Trans-X brands are some of the most competitively priced and highest quality products available.
